WESTERN PA COALITION *for* *Single Payer Healthcare*

Our Demands

Our Healthcare system is broken beyond repair. Insurance companies and for-profit-middlemen create barriers to care and massive administrative waste. These result in unnecessary suffering and deaths. For over 60 years piecemeal reforms have resulted in higher costs and the worst health outcomes among comparable nations.

We demand the elimination of private health insurance and the banning of for-profit delivery of care.

We demand the enactment of a publicly financed, national single payer program that would provide comprehensive coverage to everyone.

We demand that healthcare delivery be transformed from profit-seeking ventures into services organized to serve the people of our country, a system in which caregivers are freed from corporate control.

The National Day of Action will bring people together locally and nationally from our neighborhoods, unions, faith groups, businesses and all types of civic organizations to join **the demand to remove profit from healthcare**. We must focus our collective anger towards corporate health insurers to bring real reform: Put National Single Payer on the nation's agenda!
